SUMMARY

Motivated Associate Software Engineer with **6 months** of hands-on internship experience in full-stack development and **3+ years of hands-on experience with Java**. Proficient in building scalable applications using **Java, Spring Boot, React, Angular,** and **JavaScript**. Skilled in relational and NoSQL databases including **MySQL** and **MongoDB**. Experienced in version control using **Git** and well-versed in **MVC, Layered,** and **Microservices** architectural patterns. Currently deepening knowledge in **Event-Driven Architecture, CI/CD pipelines, AWS, Next.js, NestJS,** and **Docker** through dedicated self-study. Strong analytical thinker focused on delivering robust, user-centred solutions and eager to grow within a dynamic engineering team.

EXPERIENCE

Intern Software Engineer · NEXOVA IT SOLUTIONS

Sep 2025 – Feb 2026

Collaborated with a development team to build a full-featured **POS system** as a Full-Stack Developer using **React** (frontend) and **Spring Boot + MySQL** (backend). Involved in API integration & testing, UI design, and applying OOP and clean-code principles. Demonstrated strong teamwork, problem-solving, and adaptability.

Full-Stack Developer · KreedX Development Club — Startup Tech Community

Jun 2024 – Present

Collaborated within a dynamic startup tech community to deliver full-stack solutions for multiple client projects. Responsible for frontend and backend development using **PHP, HTML, CSS, JS** and **MySQL**, applying OOP principles to build scalable, maintainable applications.

EDUCATION & CERTIFICATIONS

– iCET ICD Developer Programme · Institute of Computer Engineering Technology (iCET)

Nov 2024 – Present

Building expertise in enterprise application development using **Java** and **Spring Boot**, with strong foundations in Object-Oriented Programming (**OOP**), design patterns, and modern software architecture. Practiced web application development using **HTML, CSS, JavaScript,** and **Bootstrap**, and later expanded frontend development skills with **React** and **Angular**. Experienced in version control using **Git** and familiar with **MVC** coding architecture, **Layered Architecture,** and **Microservices Architecture**.

– G.C.E. Advanced Level — Technology Stream (IT) · Sri Sumangala National College, Kelaniya

2021 A/L

Achieved District Rank 161 and Island Rank 1561 in the Technology stream.

• Kubernetes For Absolute Beginners — KodeKloud [View Certificate](#)

February - 2026

• Docker Foundations Professional Certificate — LinkedIn [View Certificate](#)

February - 2026

March - 2026

• AWS Basics — KodeKloud [View Certificate](#)

March - 2026

• Git | GitHub 8-Day Workshop — Pro Code Lab (PCL) [View Certificate](#)

March - 2025

TECHNICAL SKILLS

Frontend - React, Angular, JavaScript, TypeScript, HTML5, CSS3, Redux

Backend - Java, Spring Boot, Node.js, Express.js, PHP

Databases - MySQL, MongoDB, PostgreSQL

Tools & Practices - IntelliJ, Netbeans, VScode, GitHub, Postman, Swagger, Docker Desktop, OOP, MVC, Layered Architecture, MicroServices, Monolithic, Event Driven, Agile/Scrum

Soft Skills - Working with Agile Environment, Problem Solving, Team Collaboration, Quick Learning, Adaptability, Debugging & Troubleshooting, Knowledge Sharing

PROJECTS

Hotel POS Management System *React | Spring Boot | MySQL | Flyway | WebSocket | Swagger*

Completed — Intern Project

– Multi-company POS built with layered architecture, JWT auth, Redux state management, real-time WebSocket updates, and Recharts visualisation. Collaborated with 3 developers using **GitHub**, managing dependency conflicts across parallel workstreams. Validated REST APIs via **Postman** and **Swagger**, and improved backend performance through **layered decoupling**. Used **Docker** for Containerization

Dev Docrizer *React (Vite) | Node.js | Express | MongoDB*

Ongoing — Individual

– A developer-focused resource hub that centralises project assets such as requirements, ER diagrams, Figma links, and DB scripts into organised collections, solving the common problem of scattered or lost project resources. Supports bulk export of saved assets as a **ZIP** file for easy access and portability.

Library Management System *Java · JavaFX · Jasper Reports · MySQL*

Completed — Individual

– A comprehensive Library Management System built with JavaFX that provides complete CRUD operations for managing library resources. This system streamlines library operations with an intuitive interface and robust functionality.

MOS Burger POS *HTML · JavaScript · CSS*

Completed — Individual

– A web-based restaurant management system for MOS Burger that provides comprehensive functionality for order management, customer management, and store operations.
